

Nexa Bank - Card Guide

Section 1: Card Availability

Customers can have a bank card associated with their Nexa Bank account.

Authenticated customers can check whether they have a card associated with their account through the card section of the application.

A customer's card information is associated with their own account.

Customers cannot access another customer's card information.

Section 2: Viewing Card Information

Authenticated customers can view information about their own card.

Customers can access their card information through the card section of the application.

Card information is only available to the authenticated customer associated with the card.

Customers cannot view another customer's card information.

Section 3: Card Status

Customers can check the current status of their own card.

A card can have one of the following statuses:

- ACTIVE
- FROZEN
- BLOCKED

Active

An ACTIVE card is available for normal use.

Customers can use an active card for normal card transactions.

Frozen

A FROZEN card has been temporarily disabled.

Freezing a card is a temporary action. A frozen card may be unfrozen if the customer is permitted to do so.

Blocked

A BLOCKED card has been permanently disabled and cannot be used.

Blocking a card is different from temporarily freezing a card.

Section 4: Freezing a Card

Customers can temporarily freeze their own card through the card controls where permitted.

Freezing a card temporarily disables it.

A customer may be able to unfreeze a frozen card if they are permitted to do so.

Freezing a card is different from blocking a card. Freezing is temporary, while blocking permanently disables the card.

Section 5: Blocking a Card

Blocking a card permanently disables the card.

A blocked card cannot be used.

Blocking is an administrative action and is different from temporarily freezing a card.

Administrators have additional permissions to manage card status, including blocking cards where applicable.

Customers cannot block another customer's card.

Section 6: Card Permissions

Customers can view information about their own card.

Customers can manage the status of their own card where permitted.

Customers cannot:

- View another customer's card details.
- Change another customer's card status.
- Freeze another customer's card.
- Block another customer's card.

Administrators have additional permissions to manage card status where applicable.

Section 7: Card Status Differences

The three card statuses have different meanings:

Status	Meaning
ACTIVE	Card is active and available for normal use.
FROZEN	Card is temporarily disabled.
BLOCKED	Card is permanently disabled and cannot be used.

Freezing should be used when a card needs to be temporarily disabled.

Blocking is a permanent action and should not be treated as the same operation as freezing.

Section 8: Lost or Stolen Card

If a customer believes their card has been lost or stolen, they should contact Nexa Bank immediately.

The card may be frozen to prevent unauthorized use.

Section 9: Expiry Date

Every card has an expiry date. Customers should use the replacement card provided by the bank once the current card expires.

Section 10: Card Status Reference

The following status information is also provided in the Nexa Bank Card Guide:

ACTIVE

The card can be used normally.

FROZEN

The card has been temporarily disabled and cannot be used until it is reactivated.

CLOSED

The card is permanently inactive.
