

Nexa Bank - Registration and Login Guide

A plain-language guide to creating your Nexa profile, signing in, and resolving common access problems.

Demo environment

Nexa is a demonstration banking application. Do not enter real banking credentials or treat the application as a place to hold real funds.

SECTION 01

Before you register

Registration creates your personal Nexa profile. Use an email address that belongs to you and enter your own details accurately.

- Choose an email address you can remember and access.
- Have your personal details ready and prepare a strong password that you do not use elsewhere.
- You may add address information and a profile photo, but these are optional.

SECTION 02

Information requested

Only the details marked as required must be completed. Optional information can help complete your customer profile.

Required	First name, last name, email address, password, and password confirmation.
Optional	Phone number, home address, city, postcode, country, date of birth, and profile photo.

SECTION 03

Choosing your password

Your password must contain:

- Between 12 and 72 characters.
- At least one lowercase letter, one uppercase letter, one number, and one special character, such as !, ?, or #.

Enter the same password again in the confirmation box. The page shows which requirements have been met while you type.

SECTION 04

Adding a profile photo

A profile photo is optional. If you add one, choose a JPEG, PNG, or WebP image no larger than 5 MB. The application prepares the image for display automatically.

Creating and accessing your profile

Follow these steps when you are ready to register or return to Nexa.

SECTION 05

How to register

- 1 Open the registration page and enter your first name, last name, and email address.
- 2 Add any optional contact, address, date of birth, and profile-photo details you want to include.
- 3 Create a password that meets every rule shown on the page.
- 4 Enter the password again, then select **Create account**.
- 5 If registration succeeds, you are signed in and taken to your Nexa account area.

SECTION 06

What happens after registration

Your customer profile is created immediately. An email address can belong to only one Nexa profile. Some banking features may remain unavailable while your account application is waiting for review and approval, but you can still return and sign in.

SECTION 07

Signing in with email and password

- 1 Open the sign-in page.
- 2 Enter the email address used for registration.
- 3 Enter your password and select **Sign in**.
- 4 After a successful sign-in, you are taken to your account area.

Email addresses are not case-sensitive, but passwords are. Check Caps Lock if the password is unexpectedly rejected.

SECTION 08

Google sign-in and signing out

Google sign-in. If the Google button is available, choose the verified Google account you want linked to Nexa and follow the prompt. If your Nexa email already matches it, the two sign-in methods may be linked. Use the same Google account on future visits.

Signing out. Use the sign-out option when you finish, especially on a shared device. If your session expires, the application may ask you to sign in again before showing protected account information.

Help and account safety

Use this quick reference if registration or sign-in does not work as expected.

SECTION 09

Common questions

What you see	What to do
Email already registered	Use the sign-in page instead of creating another profile. Check that you entered the correct email address.
Email or password not accepted	Check for typing mistakes and make sure Caps Lock is not on. For privacy, the app does not confirm which detail was incorrect.
Password rejected during registration	Make sure every password rule shown on the registration page has been met and that both password entries match.
Profile photo not accepted	Choose a JPEG, PNG, or WebP image no larger than 5 MB, or continue without a photo.
Too many sign-in attempts	Wait for the message to clear before trying again. Repeated attempts may be paused temporarily to protect accounts.
Google sign-in unavailable or unsuccessful	Use email and password instead. If you use Google, choose the same Google account previously linked to your Nexa profile.
Banking features are not yet available	Your profile may still be awaiting account approval. Registration alone does not guarantee immediate access to every banking feature.

SECTION 10

Keeping your profile secure

- Use a different password for Nexa than for your email or other websites.
- Never share your password, sign-in details, or security codes with another person.
- Check the website address before entering your details.
- Sign out after using a shared or public device.
- If you notice unexpected activity, stop using the account and contact the appropriate support contact.

Before selecting Create account or Sign in

Check your email for typing mistakes, confirm that both password entries match during registration, and make sure every required field has been completed.
